

UNDERSTANDING “WITH-WITHOUT ITEMS” IN BILLING REGISTER

## WHAT IS A “WITH-WITHOUT ITEM”?

The easiest way to understand a With-Without item is through an example from the food industry.

Whenever a customer orders a pizza at a restaurant, he/she usually has options to customize his/her pizza with extra toppings like Mushroom, Black Olives or Cheese. He/she may also choose to skip some regular ingredients like Onion or Chilly Flakes.

So, in Billing Register, a With-Without item is any such ingredient/option (of a main item) which can be added extra or skipped by a customer while ordering an item. Simple!

Now, let's move to Billing Register and see:

- 1) How to add a With-Without item category?
- 2) How to add a With-Without item?
- 3) How to use a With-Without item in a sale?

## How to add a With-Without item category?

In Billing Register, we need to add a With-Without Item Category first and only then we can add a With-Without Item.

Let's see how to add a With-Without item category.

Now, let's remove Chilly Flakes.

Note: Chilly Flakes is a Without item; Earlier, we clicked  button to remove it. So now, we need to click  button to include it in the pizza.

Item not found  
This item is not available in the 'With' list.  
OK

We get this pop-up if we try to add Chilly Flakes as an extra topping.

We made Chilly Flakes only as a "Without" item. So, it cannot be added with the main item (pizza). The main item can only be offered without Chilly Flakes, so this pop-up appears to notify the same.
